## Subject Index

- AAS-HG, inorganic arsenic, speciation, sediment, 87  
Ambient air, Instrumental neuron activation analysis, fugitive dust, suspended particulate matter, pollutants, standard reference materials, 93  
Aquatic plants, mercury, molluscs, crustaceae, benthic invertebrates, Baltic sea, 45  
Aromatic hydrocarbons, reproduction, winter flounder, contaminants, polychlorinated biphenyls, 241  
Artificial radionuclides, Sellafield, sediments, desorption, Irish sea, 103  
Atmosphere, lead, soil, 261
- Baltic sea, mercury, molluscs, crustaceae, aquatic plants, benthic invertebrates, 45  
Beer, trace elements, reference values, wine, mineral water, tea, coffee, 181  
Benthic invertebrates, mercury, molluscs, crustaceae, aquatic plants, Baltic sea, 45  
Bioavailability, crab, bioaccumulation, metals, sediments, 27  
Biodiversity, conservation, natural resources, Venezuela, 193  
Biogeochemical emissions, vanadium, global model, 1  
Bioindication, bird feathers, heavy metals, 259  
Bioindication, photochemical oxidants, ozone, Mediterranean area, 75  
Blood, trace elements, reference values, serum, urine, 197
- Cadmium, zinc, copper, fish, 139  
Children, hair, toenails, trace elements, 275  
Chlorobiphenyls, PCB, monitoring, trends, eel, 155  
Clay, organoclay, organics, sorption, pollutants, 223  
Coffee, trace elements, reference values, wine, mineral water, tea, beer, 181  
Contaminants, reproduction, winter flounder, aromatic hydrocarbons, polychlorinated biphenyls, 241  
Copper, zinc, cadmium, fish, 139  
Crab, bioaccumulation, metals, sediments, bioavailability, 27  
Crustaceae, mercury, molluscs, aquatic plants, benthic invertebrates, Baltic sea, 45
- Denitrificator, groundwater, nitrate, redox, 17  
Desorption, Sellafield, artificial radionuclides, sediments, Irish sea, 103
- Eel, chlorobiphenyls, PCB, monitoring, trends, 155  
Environment, lead, stained glass, 11  
Environment, retrospective, future, environmental specimen bank, strategy, costs, 61
- Faecal coliforms,  $\beta$ -D-galactosidase, fluorimetry, marine waters, sewage, 175  
Fish, zinc, copper, cadmium, 139  
Fluorimetry,  $\beta$ -D-galactosidase, faecal coliforms, marine waters, sewage, 175  
Fugitive dust, Instrumental neuron activation analysis, ambient air, suspended particulate matter, pollutants, standard reference materials, 93
- $\beta$ -D-Galactosidase, faecal coliforms, fluorimetry, marine waters, sewage, 175  
Game animals, wild boar, roe-deer, stag, trace metals, toxic metals, 59  
Global model, vanadium, biogeochemical emissions, 1  
Grass, radiocesium, soil, transfer factor, Chernobyl, 147  
Groundwater, denitrificator, nitrate, redox, 17
- Hair, toenails, children, trace elements, 275  
Hydrocarbon, petroleum, pollution, New Calabar river, water, sediment, 217
- ICP-atom emission spectrometry, strontium determination, whole blood, 269  
Inorganic arsenic, speciation, sediment, AAS-HG, 87  
Instrumental neuron activation analysis, ambient air, fugitive dust, suspended particulate matter, pollutants, standard reference materials, 93  
Irish sea, Sellafield, artificial radionuclides, sediments, desorption, 103
- Lead, atmosphere, soil, 261  
Lead, stained glass, environment, 11

- Marine waters,  $\beta$ -D-galactosidase, faecal coliforms, fluorimetry, sewage, 175
- Mediterranean area, photochemical oxidants, ozone, bioindication, 75
- Mercury, molluscs, crustaceae, aquatic plants, benthic invertebrates, Baltic sea, 45
- Metals, crab, bioaccumulation, sediments, bioavailability, 27
- Mineral water, trace elements, reference values, wine, tea, beer, coffee, 181
- Molluscs, mercury, crustaceae, aquatic plants, benthic invertebrates, Baltic sea, 45
- New Calabar river, petroleum, hydrocarbon, pollution, water, sediment, 217
- Nitrate, denitrificator, groundwater, redox, 17
- Organics, clay, organoclay, sorption, pollutants, 223
- Organoclay, clay, organics, sorption, pollutants, 223
- Ozone, photochemical oxidants, Mediterranean area, bioindication, 75
- PCB, chlorobiphenyls, monitoring, trends, eel, 155
- Petroleum, hydrocarbon, pollution, New Calabar river, water, sediment, 217
- Photochemical oxidants, ozone, Mediterranean area, bioindication, 75
- Pollutants, clay, organoclay, organics, sorption, 223
- Pollutants, Instrumental neuron activation analysis, ambient air, fugitive dust, suspended particulate matter, standard reference materials, 93
- Pollution, petroleum, hydrocarbon, New Calabar river, water, sediment, 217
- Pollution monitoring, environmental specimen banking, tropical countries, bioindicators, 139
- Polychlorinated biphenyls, reproduction, winter flounder, contaminants, aromatic hydrocarbons, 241
- Poultry, rabbit, sheep, toxic metals, trace metals, 51
- Rabbit, poultry, sheep, toxic metals, trace metals, 51
- Radiocesium, grass, soil, transfer factor, Chernobyl, 147
- Redox, denitrificator, groundwater, nitrate, 17
- Reference values, trace elements, blood, serum, urine, 197
- Reference values, trace elements, wine, mineral water, tea, beer, coffee, 181
- Reproduction, winter flounder, contaminants, aromatic hydrocarbons, polychlorinated biphenyls, 241
- Roe-deer, game animals, wild boar, stag, trace metals, toxic metals, 59
- Sediment, inorganic arsenic, speciation, AAS-HG, 87
- Sediment, petroleum, hydrocarbon, pollution, New Calabar river, water, 217
- Sediments, crab, bioaccumulation, metals, bioavailability, 27
- Sediments, Sellafield, artificial radionuclides, desorption, Irish sea, 103
- Sellafield, artificial radionuclides, sediments, desorption, Irish sea, 103
- Serum, trace elements, reference values, blood, urine, 197
- Sewage,  $\beta$ -D-galactosidase, faecal coliforms, fluorimetry, marine waters, 175
- Sheep, poultry, rabbit, toxic metals, trace metals, 51
- Soil, lead, atmosphere, 261
- Soil, radiocesium, grass, transfer factor, Chernobyl, 147
- Sorption, clay, organoclay, organics, pollutants, 223
- Speciation, inorganic arsenic, sediment, AAS-HG, 87
- Specimen bank, human samples, smelter workers, metals, 157
- Stag, game animals, wild boar, roe-deer, trace metals, toxic metals, 59
- Stained glass, lead, environment, 11
- Standard reference materials, Instrumental neuron activation analysis, ambient air, fugitive dust, suspended particulate matter, pollutants, 93
- Strontium determination, ICP-atom emission spectrometry, whole blood, 269
- Surfactants, complexing agents, chemical analysis, environmental occurrence, effects on soil components, specimen banking, 479
- Suspended particulate matter, Instrumental neuron activation analysis, ambient air, fugitive dust, pollutants, standard reference materials, 93
- Tea, trace elements, reference values, wine, mineral water, beer, coffee, 181
- Toenails, hair, children, trace elements, 275
- Toxic metals, game animals, wild boar, roe-deer, stag, trace metals, 59
- Toxic metals, poultry, rabbit, sheep, trace metals, 51
- Trace elements, hair, toenails, children, 275
- Trace elements, reference values, blood, serum, urine, 197
- Trace elements, reference values, wine, mineral water, tea, beer, coffee, 181
- Trace metals, game animals, wild boar, roe-deer, stag, toxic metals, 59
- Trace metals, poultry, rabbit, sheep, toxic metals, 51
- Transfer factor, radiocesium, grass, soil, Chernobyl, 147
- Trends, chlorobiphenyls, PCB, monitoring, eel, 155
- Urine, trace elements, reference values, blood, serum, 197

Vanadium, global model, biogeochemical emissions, 1

Water, petroleum, hydrocarbon, pollution, New Calabar river, sediment, 217

Whole blood, strontium determination, ICP-atom emission spectrometry, 269

Wild boar, game animals, roe-deer, stag, trace metals, toxic metals, 59

Wine, trace elements, reference values, mineral water, tea, beer, coffee, 181

Winter flounder, reproduction, contaminants, aromatic hydrocarbons, polychlorinated biphenyls, 241

Zinc, copper, cadmium, fish, 139
